

**ALL3 POOLS Training Series – June 5 - 7, 2025  
Springfield, MO**

**Pricing: \$3,090 per person/ \$2575 per person for additional members in the same group!**

Dear ALL3 Family,

Boost your business and practical skills with instruction from top experts in ICF pool construction. We're excited to invite you to the ALL3 POOLS Training Series, our 3-day in-person event scheduled for June 5–7, 2025, at our headquarters in Springfield, MO.

This training is an interactive workshop meticulously designed for both experienced builders and DIY enthusiasts eager to enhance their skills in ICF pool construction. You'll receive comprehensive instruction and hands-on experience to master ALL3's method for constructing ICF pools. As an added bonus, we'll tour several of our award-winning ICF pools in the local area, offering you the chance to explore the intricacies involved in building these advanced pools.

This training is an investment in the future of your DIY project or pool contract business, equipping you with essential tools for success. Once you've attended a training, you are also welcome to attend future training sessions for free, and we frequently have alumni return to continue honing their skills.

**Act Fast – Limited Availability!**

Our ICF pool training classes are in high demand and fill up, with only 15 slots available! Once you've attended, as part of the family you can come back to future pool trainings for free.

**Secure Your Reservation Today!**

Secure your spot now by emailing us at [support@all3pools.com](mailto:support@all3pools.com). We will send you a secure QuickBooks link for payment processing, and once completed, your spot will be reserved. You'll receive an email confirmation with our warehouse location, the event agenda, and recommendations for nearby hotels and airport information. We look forward to welcoming you to our training series and supporting your growth and success!

## TENTATIVE - AGENDA

### Day 1: Introduction to ICF Pools: Equipment Overview and Vinyl Liner Presentation

- Pentair Equipment (Vendor Presentation): An in-depth presentation covering Pentair's premium equipment, its integration with ICF pools, and automation features demonstrated on our warehouse test pool.
- Vinyl Liner Pool Build A-Z: This interactive classroom presentation introduces our standard kits and pool construction method, offering a detailed, step-by-step 3D model walk through of the process for building in-ground ICF vinyl pools. A comprehensive 90-page training packet is included for attendees.
- How We Bid Pools: Quick summary of our method for pool bids, and we'll show you an actual winning bid proposal.
- White and Long Goods & Plumbing Review: This session provides an overview of essential components for ICF pool construction, including PVC pipes, conduit, fittings, bonding wires, and valves. It also includes an in-depth examination of plumbing systems, covering penetration considerations, assembly techniques, and layout review.
- Heater Types and Installation Layout: An overview of various pool heater types, with discussion on installation requirements, efficiency, and energy consumption.
- Site Visit: See an award winning ICF pool.

### Day 2: Hands-On Construction Techniques and Finishes

- Renolit PVC Membrane Installation (Vendor Presentation): We cover the advantages of using a commercial membrane, with a brief installation overview including best practices and product features. Also includes an introduction to membrane welding, tools, and methods, demonstrated on the test pool.
- Concrete Two-Pour (Vinyl/PVC Membrane) vs. Monopour (Plaster/Stone/Ecofinish): A detailed explanation of our two-pour concrete method for vinyl and PVC membrane pools, covering preparation, pouring, curing, and finishing. Includes a review of bracing techniques and preparation requirements for a monopour.
- Concrete Pour: Watch as a concrete and pump truck arrives on-site! We'll pour several sample ICF walls and cover the basics of floating, troweling, and finishing a monopour.
- Simulated ICF Wall Blowout: We'll also simulate an ICF blowout to learn real-time handling techniques.
- Hydraulics Review: A quick overview how we calculate water flow, and pump sizing.
- Site Visits: See more award winning ICF pools

### Day 3: Hands-On Block Construction Techniques, and Bracing

- AquaMatic Pool Covers (Vendor Presentation): A comprehensive review and presentation highlighting features and benefits, along with an installation overview on our test pool.
- Block Installation: A step-by-step guide to properly stacking and installing Elements by Logix ICF blocks, including cutting, ripping, clipping, for a liner/PVC membrane pool.
- We'll show you our block installation for Monopour, using Monopour legs for a plaster/Eco finish pool.
- Bracing: An introduction to Fab-Form footing and bracing products (Fastfoot footing fabric, Zonts, Zuckles, Zats, and Monopour legs) along with an on-site demonstration for preparing the bracing.
- Stair and Ledge Forming Techniques: Learn our method for constructing and forming ICF pool stairs and ledges for in-ground pools using Concrete Masonry Units (CMU) blocks - large rectangular blocks made from concrete.
- Site Visits: See more award winning ICF pools

Please be aware that our content schedule may vary day-to-day due to weather conditions.

However, our commitment remains steadfast in covering all the material outlined in the agenda.

We assure you that regardless of any adjustments in the daily order, all topics will be addressed comprehensively.

Warm Regards,

**ALL3POOLS**

### WHAT ATTENDEE'S ARE SAYING (Google Business Reviews)

Informative and energetic! Good balance in class and in field hands on training. Fellow students were all interesting and accomplished professionals. I look forward to doing business with A3P.

– Thomas Vose

I loved going to training with All3 Pools. I came in only knowing a little bit from watching YouTube videos and left with lots of knowledge and all the resources I need to comfortably take on a new pool build. We had hands-on training and many site visits. The handout manual is so detailed that I have no doubt that anyone with some DIY skills can get it done.

– Einar Mikkelsen

This organization is the best of the best. Their leadership and instruction was tenfold worth the trip. We are excited about our relationship with All3 Pools as they become our exclusive supplier and mentor.

– Blake Grissom

The All 3 pools team did a fantastic job on the training. We were able to see a wide range of products that should and more importantly should not be used in a pool. It is great to have their experience on my side. Thank you again!!

– Jesse Rowe

I want to thank Aaron, Eric, and Patrick for the ICF pool training they put on this past weekend. I found the training to be very interesting, fun, and informative. These guys definitely know what they are doing and their personal touch based delivery is an added bonus. 3 awesome guys! As I was driving back to Texas, I felt like the experience was money well spent. As an ICF home builder, I naturally wanted to add ICF pools to the list of services I provide. Problem was: Getting a pool company to tell you all of their secrets proved to be impossible. This class gave me the answers that I have been seeking for quite some time! If you're interested in building ICF pools, I would highly recommend that you sign up for their next training! Aaron, Eric, and Patrick: Thanks again! I look forward to doing business with y'all in the future!

– Cory Flaming

I want to thank Aaron and Eric for the stellar May 2024 pool training event that you organized and conducted in Springfield. I learned all that I hoped and needed to complete my pool design. The mix of classroom, site visits and the Suppliers you had there to describe and demonstrate their products was very good. They were a necessary and effective supplement to round out the training (without too much in sales pitches....LOL). I felt that the personnel that you trained were a good mix of DIYers and potential pool construction fabricators, and we shared a lot with each other throughout the 3 day event. It was certainly worth my time and I really appreciate all your efforts. I know it does not just happen without past lessons learned and focus on improving the training. You guys nailed it! Meanwhile, eight weeks later I have completed my slab-floor pour and have started laying the ICF walls. Going well and quickly !!

– Dennis Schmidt

The All3 Pool Team was absolutely amazing, professional, and fun to work with. I learned so much, and appreciate all the extra time they spent with me to ensure I understood everything. Thanks guys!

– Shawn Edwards
